

Forensic Investigation Report

Case: Case
Case ID: 69eb3d78d0d0996e29170578
Date: 24/4/2026
Investigator: AI Investigator

OBJECTIVE

The main aim of this system is to analyze large volumes of raw data such as call logs, records, files, and documents, which cannot be efficiently processed by humans within a limited time. The AI system performs this analysis and generates a structured report highlighting patterns and anomalies.

EVIDENCE SUMMARY

The neural engine analyzed 2 evidence artifacts using SHA-256 hash verification and pattern recognition protocols.

ANALYSIS

FORENSIC INVESTIGATION REPORT

Case Name: 2 evidence file(s) analyzed
Case ID: CASE-2026-001
Date: 2026-04-24
Investigator: AI Investigator

Report Findings:

Case Report: 2 evidence file(s) analyzed

Case Name: 2 evidence file(s) analyzed
Incident Date: 2026-04-24

Introduction:

This forensic investigation report summarizes the analysis of two evidence files, auth_log.txt and Screenshot 2026-04-23 210245.png, to identify potential security risks, anomalies, and chronological events. The purpose of this analysis is to provide a detailed technical examination of the evidence files to aid in the investigation.

Evidence Summary:

The following evidence files were analyzed:

1. auth_log.txt:
'¢ Type: Text file
'¢ 6— e: 68.44 KB

'¢ † 6, `alue: 3189b26a3200bc13...
2. Screenshot 2026-04-23 210245.png:
'¢ Type: Image file
'¢ 6— e: 943.9 KB
'¢ † 6, `alue: 40b619927be70f2c...

Technical Findings:

****Auth Log File Analysis****

1. ****Temporal Analysis****: The auth_log.txt file contains timestamp entries, which were analyzed to identify potential anomalies.
'¢ `ound 1 timestamp entry: 2026-04-23 21:02:45
'¢ The timestamp entry indicates a login attempt at 21:02:45 on April 23, 2026.
2. ****IP Analysis****: The auth_log.txt file contains IP address information, which was analyzed to identify potential security risks.
'¢ `ound 1 IP address: 192.168.1.100
* The IP address 192.168.1.100 is a private IP address, which may indicate a local network connection.

****Image File Analysis****

1. ****Code Analysis****: The Screenshot 2026-04-23 210245.png file was analyzed to identify potential security risks.
'¢ æð Ö Æ—6—÷W2 6öFR pas detected in the image file.
2. ****Security Risks****: The Screenshot 2026-04-23 210245.png file was analyzed to identify potential security risks.
'¢ æð 6V7W ity risks were identified in the image file.

Timeline:

Timestamp Event
--- ---
2026-04-23 21:02:45 Login attempt

Conclusion:

Based on the analysis of the evidence files, the following findings were identified:

- * A login attempt was made at 21:02:45 on April 23, 2026.
- * The IP address 192.168.1.100 was used for the login attempt.
- * No malicious code was detected in the image file.
- * No security risks were identified in the image file.

Risk Level: LOW

Overall Assessment:

The analysis of the evidence files identified a potential security risk related to the login attempt. However, the risk level is considered LOW due to the lack of malicious code and security risks identified in the image file.

Recommendations:

1. Investigate the login attempt to determine the identity of the user who made the attempt.
2. Review the system logs to determine if any other suspicious activity occurred around the time of the login attempt.
3. Consider implementing additional security measures to prevent unauthorized access to the system.

Overall Anomalies Detected:

- 1. [LOW] Temporal Analysis
Description: Found 1 timestamp entries
