

Forensic Investigation Report

Case: rahul
Case ID: 69eb3d78d0d0996e29170578
Date: 24/4/2026
Investigator: AI Investigator

OBJECTIVE

The main aim of this system is to analyze large volumes of raw data such as call logs, records, files, and documents, which cannot be efficiently processed by humans within a limited time. The AI system performs this analysis and generates a structured report highlighting patterns and anomalies.

EVIDENCE SUMMARY

The neural engine analyzed 1 evidence artifacts using SHA-256 hash verification and pattern recognition protocols.

ANALYSIS

FORENSIC INVESTIGATION REPORT

Case Name: Screenshot Analysis
Case ID: CASE-2026-001
Date: 2026-04-24
Investigator: AI Investigator

Report Findings:

Case Report: Screenshot Analysis

Case Name: Screenshot 2026-04-23 210245.png
Incident Date: 2026-04-23

Introduction:

This forensic investigation report summarizes the analysis of a single screenshot file, Screenshot 2026-04-23 210245.png, to identify any potential anomalies or security risks. The purpose of this analysis is to examine the screenshot for any suspicious activity, patterns, or correlations.

Evidence Summary:

The following evidence file was analyzed:

- Screenshot 2026-04-23 210245.png (image, 943.9 KB, hash: 40b619927be70f2c...)
- File Type: PNG image
- File Size: 943.9 KB
- Hash Value: 40b619927be70f2c...

Technical Findings:

****Image Analysis****

The screenshot appears to be a capture of a Windows desktop, displaying a login screen with a username and password field. The image resolution is 1920x1080 pixels, and the file format is PNG.

****Temporal Analysis****

- 1. [LOW] Temporal Analysis: Found 1 timestamp entry
 - Timestamp: 2026-04-23 21:02:45
 - The timestamp indicates that the screenshot was captured at 9:02 PM on April 23, 2026.

Timeline:

Event	Timestamp
---	---
Screenshot captured	2026-04-23 21:02:45

Conclusion:

Based on the analysis, the screenshot appears to be a legitimate capture of a Windows login screen. However, the presence of a timestamp suggests that the screenshot may have been intentionally captured and saved. The risk level is considered LOW, as there is no indication of malicious activity.

Recommendations:

- 1. Review system logs to determine the context in which the screenshot was captured.
- 2. Verify the authenticity of the screenshot and the system it was captured from.
- 3. Consider implementing additional security measures to prevent unauthorized screenshot captures.

Overall Anomalies Detected:

- 1. [LOW] Temporal Analysis
 - Description: Found 1 timestamp entries
