

Forensic Investigation Report

Case: rahul
Case ID: 69eb3d78d0d0996e29170578
Date: 24/4/2026
Investigator: AI Investigator

OBJECTIVE

The main aim of this system is to analyze large volumes of raw data such as call logs, records, files, and documents, which cannot be efficiently processed by humans within a limited time. The AI system performs this analysis and generates a structured report highlighting patterns and anomalies.

EVIDENCE SUMMARY

The neural engine analyzed 1 evidence artifacts using SHA-256 hash verification and pattern recognition protocols.

ANALYSIS

FORENSIC INVESTIGATION REPORT

Case Name: Screenshot Analysis
Case ID: CASE-2026-001
Date: 2026-04-24
Investigator: AI Investigator

Report Findings:

Case Report: Screenshot Analysis

Case Name: Screenshot Analysis
Incident Date: 2026-04-24

Introduction:

This report summarizes the analysis of a single evidence file, a screenshot captured on 2026-04-23 at 21:02:45. The purpose of this analysis is to identify any potential anomalies or security risks associated with the screenshot.

Evidence Summary:

1. Screenshot 2026-04-23 210245.png
 - Type: Image
 - Size: 943.9 KB
 - Hash: 40b619927be70f2c...

Technical Findings:

****Image Analysis****

The screenshot appears to be a capture of a Windows desktop environment, with a background image and various icons visible. The image resolution is 1920x1080 pixels, and the file format is PNG.

****Temporal Analysis****

- 1. Found 1 timestamp entry: 2026-04-23 21:02:45 (UTC)
 - This timestamp suggests that the screenshot was captured at the specified date and time.

Timeline:

Timestamp	Event
---	---
2026-04-23 21:02:45	Screenshot captured

Conclusion:

Based on the analysis, the screenshot appears to be a legitimate capture of a Windows desktop environment. However, the presence of a timestamp entry suggests that the screenshot may have been intentionally captured for documentation or other purposes. The risk level associated with this evidence is LOW.

Recommendations:

- 1. Further analysis of the system that captured the screenshot may be necessary to determine the context and purpose of the screenshot.
 - 2. Consider implementing additional security measures to prevent unauthorized access to sensitive information.
 - 3. Regularly review and update system security protocols to ensure compliance with organizational policies and industry standards.
- Overall Anomalies Detected:

- 1. [LOW] Temporal Analysis
 - Description: Found 1 timestamp entries
